

RESTAURA

Daily restaurant outreach desk.

Band agents find restaurant prospects, inspect menu-food images, generate good-looking food assets, and write cold DM/email pitches for a menu design service owner.

USER

Built for a menu design service owner.

The user needs a small daily batch of restaurants with a real outreach reason. Restaura focuses on restaurants where public menu or food images create a clear sales opening for better menu visuals.

Daily batch

Default cap is two checked restaurants per request.

Restaurant evidence

Website, menu pages, contact paths, image URLs, and source notes stay attached to the lead.

Sales angle

The pitch points to the food-image issue and offers a sample upgrade.

WORKFLOW

Four Band agents work in sequence.

01

Lead Scout

Parses the prompt, searches Exa, validates restaurant sites, and passes candidate leads forward.

02

Visual Inspector

Checks public food/menu images with Featherless vision and writes the visual issue.

03

Pitch Copywriter

Writes subject lines, cold email, DM, SMS, and notes from the evidence.

04

Food Design Director

Creates the food-image asset direction, generates a PNG, and delivers the packet to Telegram.

OUTPUT

Telegram receives the outreach packet.

Lead sheet

- Restaurant name and official website
- Contact path and evidence links
- Image issue and upgrade direction

Pitch pack

- Cold email, DM, SMS, and subject lines
- Generated menu-food PNG asset
- Short notes for manual sending

2

Restaurant lead cap per run.

4

Agents visible in Band.

1

Telegram packet at completion.

DEMO PROMPT

@Lead Scout smart search: find 1 restaurant in Austin, TX with bad food/menu images

The room shows the handoff chain as each agent works. The final Telegram packet gives the user a checked restaurant lead, sendable pitch copy, and a generated food asset to include in outreach.

Input

A single Band message from the user.

Agent work

Research, inspection, copywriting, design, and delivery.

Action

The user sends the pitch manually to the restaurant contact path.
